

This is in reponse to the proposed rule changes being enacted and LPFM being given propriety over FM translator service. My family and I listen to K-Love radio station everyday. I live in a small community and enjoy K-Love there as well as when we travel. This is a provision for families and children to listen to good, clean radio.

Our communities are surrounded today with "on the edge" radio shows and this station is a geat encouragement to alot of people. This is now being endangered by the proposed expansion of LPFM stations. I urge you to consider the number of people this wil impact as K-Love reaches ALOT of people and is very much so part of public interest.
